# Cluj's finance services and technology market

Romania, local employers and the university talent base

Market research overview  
Cluj-Napoca, 19 September 2026

Evidence cut-off  
17 September 2026

# Research background and scope of the analysis

Romanian Economic Monitor (RoEM), a research project of Babeş-Bolyai University's Faculty of Economics and Business Administration (FSEGA).

---

## RoEM expertise and references

Public economic data, forecasts and interactive dashboards.  
Applied macroeconomic, regional and sector research.

## Selected research assignments

AmCham Romania: U.S.–Romania relations (2022–2023)  
Embassy of Italy: investment and trade impact (2024)  
Confindustria Romania: country guide (2024–2026)  
EBRD / Transilvania IT Cluster: IT market study (2026)

## Awards and recognition

Emerald Real Impact Award 2021, category winner.  
COVID-19 Data Challenge, honourable mention (2020).

---

## Disclaimer: Preliminary market assessment

BMW TechWorks Romania requested this detailed assessment, prepared within one week.

The analysis uses public, industry and selected institutional sources. Findings, estimates and interpretations are indicative, not exhaustive or fully validated.

It provides a starting point for further assessment.  
A separate commissioned study can add broader data, source cross-checks, interviews and benchmarking tailored to BMW TechWorks' needs.

**Project portal:**

<https://econ.ubbcluj.ro/roem/>

**Assoc. Prof. Rácz Béla-Gergely, PhD**

Senior Researcher, Romanian Economic Monitor (RoEM)

# Cluj combines finance experience with technology skills

Strong county indicators and varied local activities define the market, with a clear wage premium.

## Economic setting

Cluj county’s GDP per resident was 45.6% above Romania in 2024.  
National growth has slowed while inflation remains elevated.

## Finance and technology

Local roles cover accounting and controlling, with banking and insurance examples.  
Finance data, software and ERP work broaden the documented activity base.

## Education and languages

Accounting, finance and business informatics have documented study and exam routes.  
German business programmes add a relevant language pathway.

## Local cost base

Cluj county’s gross average pay was 19.5% above Romania in 2024.  
Office vacancy was 8.6% at end-2025, lowest of four regional cities covered.

**The clearest evidence concerns corporate finance and systems work, supported by relevant education routes.**

County pay covers all occupations. Education routes do not quantify available specialists or workplace German.

# Five dimensions frame the market assessment

The research connects the economic environment with activity, talent and service delivery.

## Economic context

Romania’s macroeconomy  
Cluj’s relative position

## Local activity

Employers and sectors  
Documented finance work

## Talent and education

Experience and graduates  
Language requirements

## Cost structure

Pay and workplace costs  
Wider delivery costs

## Service delivery

In-house, external provider  
and hybrid arrangements

National data, county indicators and local employer evidence answer different questions.

The dimensions organise the evidence. They do not form a location or readiness score.

# Finance work spans three distinct activity groups

Related skill families have different product, language and control requirements.

| Corporate finance        | Customer finance                   | Finance technology      |
|--------------------------|------------------------------------|-------------------------|
| Accounting and close     | Credit and origination             | SAP and data interfaces |
| Controlling and FP&A     | Contract servicing                 | BI, testing and UAT     |
| Payables and receivables | Collections and product accounting | Automation and controls |

The three groups describe the market’s activities and the skills associated with them.

Illustrative taxonomy. Local evidence varies by task and does not establish end-to-end capability.

# Growth has slowed while inflation remains elevated

Q2 2026 GDP: 0.0% q/q and -2.0% y/y, seasonally and calendar adjusted.

## Real GDP growth

Annual change, %

## HICP inflation

Annual average, %

**The May forecast anticipates a 2027 recovery; the latest quarterly release shows continued weakness.**

Orange bars and F = RoEM forecasts for GDP and EC forecasts for HICP. Historical estimates are revisable.

# The forecast deficit narrows, but public debt keeps rising

European Commission Spring 2026: a consistent 2022–2027 comparison.

## Government deficit

Annual shortfall, % of GDP

## Gross government debt

Year-end stock, % of GDP

**The projected adjustment reduces the annual deficit while the accumulated debt ratio continues to rise.**

Deficit magnitude is shown positive. Debt is a year-end stock. Orange bars and F = RoEM forecasts.

# Exchange rates change the euro value of local costs

RON per EUR, with annual averages separated from the latest daily reference.

Annual average, RON per EUR

5.2629

Daily reference, 16 September 2026

6.50% BNR policy rate

Held on 10 August 2026

BBB– / Negative

Fitch, affirmed 31 July 2026

For a fixed leu expense, a higher RON/EUR rate lowers its euro equivalent. Local price changes may offset this.

ECB reference rates are informational. Annual averages and daily rates have different time bases.

# Romania combines low labour costs with 76% of EU output per hour

2025 national averages for five CEE economies, with the EU as a reference.

## Hourly labour cost

EUR per hour

## GDP per hour worked

PPS, EU = 100

**Romania is below Hungary, Poland and Czechia on labour cost, and above Hungary and Poland on GDP per hour.**

Coverage differs: labour cost covers enterprises 10+, NACE B–N/P–S; productivity covers the whole economy.

# Romania has an established business-services sector

National sector scale provides context for the local market.

|                                                                                            |                                                  |                                       |
|--------------------------------------------------------------------------------------------|--------------------------------------------------|---------------------------------------|
| National scale                                                                             | <b>280,000+</b><br>professionals                 | 1,000+ centres                        |
| Economic contribution                                                                      | <b>€35.5bn</b><br>gross value added, 2025        | About 10% of Romania’s GVA            |
| Finance and accounting                                                                     | <b>20%</b><br>of 54,285 survey-covered employees | 69% of participating firms report F&A |
| Finance and accounting are established activities within a large national services sector. |                                                  |                                       |

The survey shares use different denominators. They cannot estimate Cluj’s finance workforce.

# Financial services provide a broad sector background

Banking, insurance and pensions create a national base of financial-domain experience.

**RON 1,008.4bn**

**Banking assets**

March 2026  
+9.5% year on year

**RON 6.8bn**

**Gross written insurance premiums**

Q1 2026, including branches  
+15% year on year

**RON 220.4bn**

**Private pension assets**

March 2026  
11.5% of 2025 GDP

**The national market provides relevant experience in products, risk, reporting and technology.**

These are national sector measures. They do not quantify Cluj-based functions or available staff.

# Cluj leads Romania's counties in GDP per resident

2025 GDP per resident, CNSP estimates. Registered unemployment: latest available, July 2026.

€29,069

GDP per resident in 2025 (estimate)

45.6% above Romania  
#1 of 41 counties, excluding Bucharest

Registered unemployment

Cluj 1.49%    Romania 3.25%

31 July 2026, administrative rate

Cluj combines high output per resident with low registered unemployment.

County indicators include areas outside the city. GDP per resident is not labour productivity.

# Cluj’s average gross pay is 20.1% above Romania

June 2026 gross monthly average wage, RON. Six territorial units plus the national reference.

+20.1%

Cluj above Romania

Cluj: RON 11,490  
Romania: RON 9,564

\* Bucharest is a municipality, shown separately from counties.

Cluj’s pay premium is consistent with a high-value local economy and competition for skilled employees.

Monthly averages cover all occupations and fluctuate with bonuses. They do not represent finance-role pay bands.

# Information, communication and finance stand out in Cluj

2024 county gross value added (GVA), current basic prices, provisional estimates.

Information, communication and finance carry more weight in Cluj; professional and support services carry less.

Services include public services. NACE sectors describe economic activity, not finance occupations or available staff.

# Cluj’s finance ecosystem spans five organisational settings

24 selected employer-city operations, grouped by primary activity. September 2026 research sample.

| Primary group          | Count | Named operations                                            |
|------------------------|-------|-------------------------------------------------------------|
| In-house finance       | 6     | E.ON, Alstom, Steelcase, Emerson, Vertiv, Viking            |
| External providers     | 3     | Genpact, EXL, B&D Global Accounting Services                |
| Professional services  | 6     | KPMG, PwC ADM, Deloitte, BDO, EY, RSM                       |
| Financial institutions | 3     | Banca Transilvania, BT Leasing, Groupama                    |
| Technology employers   | 6     | BMW TechWorks, MHP, Bosch, Accenture, MassMutual, Regnology |

Corporate finance, providers and financial technology contribute different forms of local experience.

The sample is selective. Activities can overlap across categories, and company counts do not measure staffing.

# Financial institutions and software firms broaden local expertise

Selected local examples link financial products and administration with technology expertise.

## Financial institutions

### Banca Transilvania

Registered office in Cluj and prudential-risk role evidence\*

### BT Leasing

Leasing headquarters in Cluj-Napoca

### Groupama

Insurance sales, policy administration and renewal follow-up

## Technology employers

### BMW TechWorks

Cluj software hub with an explicit BMW Financial Services remit

### MassMutual

Technology employer with a Cluj office

### Regnology

Regulatory-reporting software company with a Cluj office

**Banking, leasing and insurance activity complements the city’s accounting and financial-software experience.**

\* BT risk-role evidence covers Cluj and Bucharest. Office presence alone does not locate every function or team.

# Finance recruitment extends beyond city-specific roles

46 advertisement records from eight employers, frozen on 15 September 2026.

Location scope, all 46 records

Cluj core finance, 18 records

The sample documents local finance work alongside multi-city and Romania-remote opportunities.

Selective search across 25 employers. Advertisement records differ from vacancy counts. One EXL notice lists 19 seats.

# Cluj-based universities have a substantial student base

Degree enrolment at UBB and the Technical University of Cluj-Napoca (UTCN).

| University and period                | Bachelor | Master | Doctoral | Total  |
|--------------------------------------|----------|--------|----------|--------|
| Babeş-Bolyai University, UBB<br>2025 | 32,007   | 9,903  | 1,830    | 43,740 |
| Technical University, UTCN<br>2025   | 14,002   | 4,529  | 978      | 19,509 |

FSEGA, UBB’s economics and business faculty (FSEGA)      19.6% of UBB bachelor students  
20.3% of UBB master students

Faculty shares in 2025/26. FSEGA is already part of the UBB totals.

UBB’s FSEGA and UTCN’s technical programmes provide complementary education routes.

Institution-wide counts include study locations outside Cluj. Enrolled students cover all study years.

# Accounting examinations show recurring programme output

Romanian Accounting and Management Information Systems BA, by two-session examination cycle.

**The last complete reported cycle records 122 successful full-time and 42 distance examinations.**

Counts cover successful final examinations. They do not measure cohort graduation rates or available hires.

# German-language study includes business and computing

UBB institution-wide enrolment, with selected programme observations at their own reference dates.

**German-language business and computing programmes provide relevant education routes.**

Programme observations overlap with the UBB population at different dates. No combined hiring pool follows from these counts.

# Corporate finance tasks span transactions, close and reporting

Selected Cluj examples show a broader remit than invoice processing alone.

| Activity                    | Documented tasks                                                     | Cluj example / status                |
|-----------------------------|----------------------------------------------------------------------|--------------------------------------|
| Transaction processing      | Supplier invoices, reconciliations, billing and corrections          | Genpact<br>Cluj hybrid roles         |
| Close and process controls  | Journals, fixed assets, reconciliation and journal review / approval | Alstom; Vertiv<br>Vertiv role closed |
| Project controlling         | Cost and margin analysis, cash forecasts and project estimates       | Alstom<br>Switzerland portfolio      |
| Statutory reporting support | GAAP-to-STAT conversion and local-GAAP statements                    | PwC ADM<br>Role filled               |

**Cluj combines transaction processing with financial close, controlling and reporting support.**

Task descriptions, including closed roles, show activity breadth. They do not measure available capacity or proficiency.

# Finance roles connect analysis, data controls and ERP change

Specific employer tasks reveal how financial knowledge and technology skills intersect.

| Activity                   | Documented tasks                                                      | Employer / location                 |
|----------------------------|-----------------------------------------------------------------------|-------------------------------------|
| Finance data and analytics | P&L forecasts, data validation, system loads, dashboards and UAT      | Vertiv<br>Cluj, Americas remit      |
| Finance process transition | Process mapping, knowledge transfer, data reconciliation and handover | Vertiv<br>Cluj roles                |
| SAP finance implementation | FI / DRC configuration, migration, integration tests and cutover      | MHP<br>Cluj / Bucharest / Timișoara |

Finance data work and ERP implementation extend the market beyond routine transaction processing.

MHP lists three eligible cities. Forecast consolidation is planning work, not statutory consolidation.

# Financial-services roles add reporting and control experience

Banking, leasing and insurance examples complement the broader accounting base.

| Evidence / location                     | Documented tasks                                                     | Scope / status                                           |
|-----------------------------------------|----------------------------------------------------------------------|----------------------------------------------------------|
| EXL<br>Cluj                             | Banking and treasury customer requests; digital-platform support     | Banking administration<br>No credit approval stated      |
| BT Leasing<br>Cluj                      | Customer / contract portfolio analysis; risk and performance reports | Leasing-domain reporting<br>Historical Jul–Aug 2026 role |
| Banca Transilvania<br>Cluj or Bucharest | Capital and risk reporting; RWA / COREP data validation              | Retained role description<br>City allocation unknown     |
| Groupama<br>Cluj                        | Control testing, authority checks and claims-file review             | Insurance control work<br>Role dated 14 September 2026   |

Financial institutions add domain-specific reporting and control work to the local finance ecosystem.

The examples do not establish an end-to-end local customer-loan or lease accounting operation.

# Delivery models differ in control, cost and coordination

Cluj hosts group finance teams and external providers. Hybrid delivery is an analytical combination.

| Model                     | Work and responsibility                                 | Local illustration                         | Cost and coordination                                       |
|---------------------------|---------------------------------------------------------|--------------------------------------------|-------------------------------------------------------------|
| In-house group team       | Group employs staff and organises finance delivery      | E.ON Business Services<br>Alstom           | Employment and overheads;<br>internal process coordination  |
| External service provider | Contract defines service scope, controls and escalation | Genpact<br>EXL                             | Service fee and transition;<br>contract / service oversight |
| Hybrid                    | Internal team and provider share defined process steps  | General model<br>No specific case asserted | Combined cost base;<br>interfaces and handoffs              |

**Model choice depends on process scope and governance; local employer presence alone does not determine fit.**

Illustrative market framework. Named companies show local organisational types; no client contract or available capacity is assumed.

# National gross pay ranges vary across finance roles

Hays Romania Salary Guide 2026. Gross RON per month, full-time roles. Salary inputs collected in 2025.

| Business-services role                             | Minimum, RON | Maximum, RON |
|----------------------------------------------------|--------------|--------------|
| Junior accounts payable accountant                 | 4,700        | 8,300        |
| Accounts payable accountant                        | 6,600        | 10,800       |
| Collections / credit analyst / accounts receivable | 7,300        | 11,000       |
| General-ledger accountant                          | 8,500        | 14,300       |
| Senior general-ledger accountant                   | 11,000       | 16,500       |
| Controlling / reporting / planning analyst         | 9,000        | 15,000       |

AP and AR ranges overlap. General-ledger and analytical roles extend to higher quoted pay levels.

National recruiter estimates, excluding bonuses and benefits. The guide does not provide Cluj-specific salary bands.

# Cluj has a larger office stock and lower vacancy

Four regional cities covered by Cushman & Wakefield Echinox. Modern office market, year-end 2025.

Modern stock, thousand m<sup>2</sup>

Vacancy, % of modern stock

**37,000 m<sup>2</sup>** Cluj gross leasing volume in 2025, including lease renewals

Cluj’s lower vacancy indicates less leasing slack than in the other three regional markets.

Vacancy is a market-wide measure. It does not establish the availability of suitable units in a particular building.

# Office rent is one component of occupancy cost

2026 report benchmarks and selected property asking rents observed on 17 September 2026.

Class A prime rent, report benchmark

€15–17 / m<sup>2</sup> / month

Service charge, report benchmark

€3.5–5 / m<sup>2</sup> / month

| Advertised building          | EUR / m <sup>2</sup> / month | Headline area              |
|------------------------------|------------------------------|----------------------------|
| Liberty Technology Park, D–E | 12.5 + VAT                   | 550–1,750 m <sup>2</sup>   |
| Vivido Business Center       | 14.5 + VAT                   | 250 m <sup>2</sup>         |
| Cluj Business Campus         | 15.0 + VAT                   | 223 m <sup>2</sup> minimum |

Comparable occupancy costs also depend on service charges, fit-out, incentives and the lease terms.

Property asks are plus VAT. The report’s VAT basis is unspecified. Building-specific service-charge amounts are not published.

# Cluj’s finance strengths coexist with local cost pressure

Documented activity and education underpin the market. Available specialist capacity is harder to quantify.

## Established strengths

### Recurring finance work

Accounting, close and controlling recur across local employers.

### Finance and technology

Data controls and ERP change connect finance with systems expertise.

### Relevant education

Accounting and finance routes coexist with business studies taught in German.

## Observed market pressures

### Higher county pay

Gross average wage: 19.5% above Romania in 2024, across all occupations.

### Lower office vacancy

Cluj: 8.6% at end-2025, the lowest among four covered regional cities.

### National macro pressure

Weak growth and elevated inflation complicate the operating outlook.

**Cluj’s position rests on varied finance work and education, alongside a higher local wage base.**

Unmeasured: available specialists with German, comparable total costs and complete loan / lease accounting coverage.

# Existing expertise supports further finance specialisation

Analytical possibilities based on observed tasks and education routes. These are not growth forecasts.

| Development direction               | Existing foundation                                                                      | Conditions for development                                                       |
|-------------------------------------|------------------------------------------------------------------------------------------|----------------------------------------------------------------------------------|
| Finance data and automation         | Close, forecasting and data controls. ERP change and process transfer.                   | Finance knowledge combined with systems skills and clear process responsibility. |
| Specialist reporting and controls   | Statutory support and banking / leasing reports. Insurance controls.                     | Product expertise, task-specific training and accountable review.                |
| Business German with finance skills | Business and computing programmes taught in German. Role-specific language requirements. | Workplace proficiency, relevant finance skills and local graduate retention.     |

Further specialisation can build on existing finance tasks, systems work and education routes.

Further research: available specialist staff, matched total delivery costs, annual graduate output and local retention.

# Appendix

Evidence cut-off  
17 September 2026

# Definitions and evidence scope

Ten appendix slides provide supporting detail. The evidence cut-off is 17 September 2026.

| Dimension             | How to read the evidence                                                                                                                 |
|-----------------------|------------------------------------------------------------------------------------------------------------------------------------------|
| Geography             | Country, county, city and institution figures cover different populations. Institution totals can include locations outside Cluj.        |
| Time and status       | Observation periods, publication dates and source checks differ. F marks forecasts. Historical or closed roles keep their stated status. |
| Education             | Enrolment covers all study years. Exams cover stated sessions. Teaching language does not certify workplace proficiency.                 |
| Activity and capacity | Presence and advertisements document activities or requirements. Records, available posts and recruitable staff are different units.     |

Comparisons retain each source’s population, geographic coverage and reference period.

A02–A03 employers. A04–A05 advertisements. A06–A07 education. A08 salaries. A09 sources. A10 costs.

# Six corporate employers document recurring finance work

Selected company descriptions and finance-role examples in Cluj-Napoca.

| Employer  | Documented finance work in Cluj                                          |
|-----------|--------------------------------------------------------------------------|
| E.ON      | Payables, receivables, general ledger, assets, leases and IT controlling |
| Alstom    | General ledger, fixed assets, close and project controlling              |
| Steelcase | General ledger, close, financial controls and accounting automation      |
| Emerson   | Close, HFM reporting, reconciliations and cost-centre analysis           |
| Vertiv    | Close, controls, forecast compilation and finance-data automation        |
| Viking    | Payables, receivables, general ledger and master data                    |

**37 EMEA entities** served by Alstom’s Cluj Finance Operations Centre

Accounting, close and reporting recur across employers, alongside project control and finance-data work.

Selected 2026 roles include closed advertisements. They document tasks and requirements at the time of publication.

# Provider examples cover accounting and statutory reporting

Four representative profiles with different connections to local delivery.

| Organisation | Documented finance tasks                                                   | Local connection                                                |
|--------------|----------------------------------------------------------------------------|-----------------------------------------------------------------|
| Genpact      | Supplier invoices and reconciliations.<br>Billing and invoice corrections. | Cluj hybrid roles.<br>R2R examples: Romania remote.             |
| EXL          | Close and inventory accounting.<br>Banking customer requests.              | Closed Cluj accounting role.<br>Separate local banking support. |
| PwC ADM      | Statutory accounts, GAAP-to-STAT.<br>Workiva.                              | Cluj support for Western European<br>PwC firms. Role filled.    |
| BDO Romania  | Accounts, reports and budgets.<br>Statutory financial statements.          | Cluj coordinator named.<br>Local task allocation unspecified.   |

The reviewed services range from routine accounting to statutory statements and management reporting.

These profiles do not rank suppliers. Public evidence does not establish comparable available capacity or prices.

# Advertisement sample by geography and activity

46 eligible advertisement records from eight employers. Sample frozen on 15 September 2026.

| Advertised geography           | Core finance | Finance enabling | Total |
|--------------------------------|--------------|------------------|-------|
| Cluj-Napoca                    | 18           | 4                | 22    |
| Multiple cities including Cluj | 11           | 1                | 12    |
| Romania remote                 | 12           | 0                | 12    |
| Total                          | 41           | 5                | 46    |

The sample documents several recruitment geographies and remains a selective view of the market.

A record may cover several posts. The EXL notice lists 19. Later source checks do not change the frozen sample.

# German requirements vary by finance role and location

Selected finance and enterprise-system roles, with advertised locations and language requirements.

| Employer / location                   | Role examples                                     | Language requirement                                |
|---------------------------------------|---------------------------------------------------|-----------------------------------------------------|
| Genpact<br>Romania remote             | I2C and customer-care collections, two records    | German C1 required                                  |
| Bosch<br>Cluj-Napoca                  | Controller in Customer Team                       | Good English mandatory.<br>German is a plus.        |
| Alstom<br>Cluj-Napoca                 | Project finance and record to report, two records | Fluent English.<br>German desirable or recommended. |
| MHP<br>Multiple cities including Cluj | SAP FI / DRC<br>Senior Consultant or Manager      | Fluent English.<br>No German requirement stated.    |

German requirements depend on the role and service market. English also appears in local and multi-city roles.

Within the 46-record sample, two Romania-remote roles require German C1 and three Cluj roles describe German as desirable.

# Accounting and finance have identifiable student populations

Selected FSEGA bachelor programmes in Cluj-Napoca. Counts cover all study years.

| Programme                        | Language  | Enrolled students             | Reference period |
|----------------------------------|-----------|-------------------------------|------------------|
| Accounting & Information Systems | Romanian  | 691 full-time<br>266 distance | 2024/25          |
| Accounting & Information Systems | English   | 82 full-time                  | 2025/26          |
| Finance & Banking                | Romanian  | 524 full-time                 | 2025 evaluation  |
| Finance & Banking                | English   | 73 full-time                  | 2025 evaluation  |
| Business Informatics             | Hungarian | 131 full-time                 | 2025 evaluation  |

The selected Romanian accounting and finance programmes have larger enrolments than their English routes.

Snapshots cover different periods and include extended studies. Distance students may live outside Cluj.

# Teaching languages vary across finance-related degrees

Selected FSEGA teaching routes in Cluj-Napoca, including German curricula for 2026/27 entrants.

| Degree route                              | Teaching language            | Finance-related content                    |
|-------------------------------------------|------------------------------|--------------------------------------------|
| Accounting & Information Systems BA       | Romanian, English            | Accounting, reporting and systems          |
| Finance & Banking BA                      | Romanian, English, Hungarian | Finance, banking and analysis              |
| Business Informatics BA                   | Romanian, Hungarian          | Business systems and data                  |
| Business Administration BA, German route  | German                       | Managerial accounting and controlling      |
| International Management MA, German route | German                       | International accounting and data analysis |

Language coverage depends on the degree. German business curricula include accounting and analysis subjects.

Teaching language describes the programme. It does not certify an individual’s workplace proficiency.

# Local accounting offers reflect different duties and experience

Three Cluj-Napoca employer advertisements, checked 17 September 2026. RON net per month.

| Employer    | Role and experience                       | Net RON / month | Examples of duties                                         |
|-------------|-------------------------------------------|-----------------|------------------------------------------------------------|
| Vibre Hotel | Junior accountant<br>1–2 years            | 3,700–4,500     | Primary accounting<br>and stock records                    |
| CARPAT RAIL | Accountant / administrator<br>3+ years    | 4,000–8,000     | Close, tax filings and<br>personnel administration         |
| Greencells  | Senior accountant, operations<br>5+ years | 8,200–10,500    | International accounting,<br>treasury support and controls |

The observed ranges cover distinct roles, from junior bookkeeping to experienced international accounting.

Selected advertised offers, with pay components not fully specified. They do not establish a Cluj average or a German-language premium.

# Sources and reference periods

Evidence cut-off: 17 September 2026. Advertisement sample freeze: 15 September 2026.

| Evidence block   | Main sources                                                | Reference periods                                 |
|------------------|-------------------------------------------------------------|---------------------------------------------------|
| Economy          | EC, Eurostat, CNSP / INS, ANOFM, ECB, BNR, ASF, GISCO, ABSL | Historical series.<br>2026–2027 forecasts.        |
| Employers        | Company pages, roles and public records.                    | Historical / 2026 records.                        |
| Education        | UBB / UTCN, FSEGA, ARACIS.                                  | 2021/22–2026/27.                                  |
| Pay and offices  | Hays, C&W Echinox, eJobs, ESOP and Crosspoint.              | 2025 inputs / stocks.<br>2026 reports and offers. |
| Employment costs | ANAF; Inspectia Muncii.                                     | 2026 cost illustration.                           |

The source date and the observation period remain distinct throughout the presentation.

Historical and closed job descriptions retain their original status. Exact source URLs are listed in the notes.
